**2005 - 2008 :** Learning *Biology* in UCBN (University of Caen Basse – Normandie).

**2004 :** Getting *Scientific Baccalaureate* (BAC S).

**2003 :** Getting *Bafa certificate* (Animation for kids in camps).

**2001 :** Coding my **first website**.

## ***My languages and knowledge***

=> *Human Languages :*

***French – English – Spanish*** : Read/Write/Speak - Confirmed.

=> *Computer languages :*

**Web : HTML5 , CSS3 , PHP5 PDO, SQL, JavaScript, JQuery, Ajax (Asynchronous communication).**

**Structural :** Unix, C, LUA - **Confirmed.** / C + +, Python, Ruby - **Learning.**

**Industrial Design :** OpenSCAD - **Confirmed.**

=> *Scripts/Frameworks :*

**Known/Used :** React.js, Node.js, Three.js, ResponsiveVoice.js, Annyang.js, Bootstrap, PHPMyAdmin/MYSQL.

**Learning :** Node.js, Angular.js.

=> *Design :*

**Photoshop – Confirmed.**

=> *CMS :*

**Wordpress, SPIP, Drupal.**

=> *Live Demos :*

**On Demand.**

## ***My 'Internet Of Things'***

**IoT Dev Modules** : abilities for *RaspberryPi and Arduino* devices.

**Real Time data process** : abilities to develop a full platform from **A to Z**.

**A.I. Environment** : abilities to develop a **full A.I. system** for any kind of website and webapp.

## ***My searches***

- **Web Development** (speciality) and infrastructure, physical and biophysical web based applications.
- **Development and analysis** in the *Big Data and Cloud Computing*.
- Industrial design and **3D printing**.
- **Extend my abilities by all means**.
- *Woman*. I have better chances with robots, **so let's work !**

## ***Skills and Motivation !***

I can **adapt** myself quickly to **work as a team**, I can **implement practical solutions** for projects necessitating a distribution of roles. I have **initiative and creativity**, visualization of 3D object/space is not a problem. I am also formed to plastic **3D printing** and the 3D object design with Open Source Software.

I can help my colleagues according to the skills required for the **first medical help** in case of an emergency. I can drive but i have no personal car.

Eventually I am good to film people, i have some movie making abilities. In past i have done some live transmission on Internet as cameraman in some concerts, official meetings and demonstrations.

I am a right person with honor and faith in mankind, do not try to test my limits with a bad attitude. And **yes it is possible to be happy at work**.

In Web Solutions, you need **performance and security**. This is why - *from my viewpoint* - you need me. I will block at least Social Engeneering performer, will you do ?

**I coded my first website in 2001.**

## ***...Where am I not so good ?***

I do not know code for *Android or IOS* for now. I have some little things to learn for now...

Do not ask me to hack or steal information/database. If you try, the police will find you faster than you think. Question of time, *there is no way back on this subject*.

Do not ask me to communicate on process and/or developement on my previous works in other companies, I do not play this game.

I am not good to be a slave, it is bad for productivity. Let me think as a free man with realistic deadlines, otherwise, please do not contact me we will win a precious time.

Ho, and surely the most important thing !

I am a very bad guitarist. Fortunately, this is not a problem **to make some great and inventive code**.

***I hope to work with you soon :)***
